SIGNALPOINT PARTNERS

Project Management & Delivery Capabilities

SignalPoint Partners leads technology project delivery from planning through turnover. We manage agreed project scope, schedules, vendors, risks, and closeout. Atlanta-based, we serve Georgia and remote engagements nationwide.

Core services

Full Project Delivery: dedicated leadership for an agreed scope, including delivery planning, schedules, vendor coordination, risks, dependencies, progress reporting, and closeout. Typical deliverables: project plan, milestone schedule, risk and issue log, and status reports.

Implementation & Site Coordination: focused execution support within an existing project. Coordinate site readiness, installation activities, access, resources, and trade dependencies. Typical deliverables: readiness checklist, field action log, and progress reports.

Commissioning & Turnover Coordination: ownership of completion readiness, testing schedules, outstanding issues, documentation, and operational handoff. Typical deliverables: readiness tracker, outstanding-issue log, and turnover checklist.

Leadership experience

Our leadership brings more than a decade of telecommunications, low-voltage, network infrastructure, and technology project-delivery experience across healthcare facilities, commercial and residential developments, and mission-critical data center environments.

Representative experience includes technical-team leadership, hospital and clinic network integration, multi-vendor coordination, and interdependent data center workstreams. This experience reflects work in roles before SignalPoint Partners was formed.

A delivery model shaped around your project

Each engagement has a defined scope, a designated project lead, and clear responsibilities. SignalPoint manages delivery and client communication, coordinating responsible vendors and technical teams. Specialized design, installation, and testing are assigned to appropriately qualified providers. Scope and onboarding requirements are agreed during discovery.

Discuss your project needs
